Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 11-13, 35-37, 39 and 40 were rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction is noted and the rejection is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4, 6-10, 14, 15, 30, 33, 34, 38, 41, 42, 44 and 45 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,350,277 to Kocur.

Kocur discloses a stent having a longitudinal axis comprising: a non-woven tubular element having a plurality of openings therein the tubular element comprising a plurality of interconnected members which form at least one continuous pathway which extends all the way around the longitudinal axis, the stent further comprising at least one frangible restraining member (115) which is made of a different material (Column 6 lines 5-52) from that of the stent (Column 2 lines 5-9), the frangible member restraining at least two interconnected members from self- expansion, at least a portion of the stent constructed and arranged to self-expand upon breaking of the at least one frangible restraining member (Column 8 line 61-Column 9 line 19).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11, 12, 13, 35, 36, 37, 39 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kocur '277 in view of U.S. Patent No. 5,591,223 to Lock et al.

Kocur discloses that the frangible restraining members will break at a predetermined applied force (Column 8 lines 9-11). Kocur discloses the claimed invention except for the specific pressures at which the frangible restraining members break. Lock teaches that frangible members can withstand up to 10 atms before breaking and allowing the stent to expand (Column 5 lines 8-22). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Kocur with the specific application pressures of Lock in order to restrain the device until it is placed in the body and in position to expand.

Response to Arguments

6. Applicant's arguments with respect to claims 1-4, 6-15, 30, 33-41, 44 and 45 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3731

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
